

How to use PosSize.exe

For many years, I use the NumPad on my PCs to resize/move with "PosSize.exe" windows on the screens. For this I use "HotkeyP" (freeware on <http://petr.lastovicka.sweb.cz/others.html>):

Alt+Win+ /	=	width 1/3 screen
Alt+Win+ *	=	width 1/2 screen
Alt+Win+ -	=	width 2/3 screen
Alt+Win+ +	=	height 1/2 screen
Alt+Win+ Enter	=	full height
Alt+Win+ 0	=	full screen (width and height)
Alt+Win+ .	=	move to the next monitor
Alt+Win+ 7	=	top - left
Alt+Win+ 8	=	top
Alt+Win+ 9	=	top - right
Alt+Win+ 4	=	left
Alt+Win+ 5	=	center
Alt+Win+ 6	=	right
Alt+Win+ 1	=	bottom - left
Alt+Win+ 2	=	bottom
Alt+Win+ 3	=	bottom - right

and for fixed standard sizes Ctrl+Win+ 1 to 0 (normal keys), f.e. 0 = 640 x 480 etc.
