## PURE CODE FOR OBJECT SCRIPTING

### Features

- mobile programming, no installation, administration or configuration needed
- easy to deploy with text code or byte code scripting
- big library of 430 examples and exercices
- debug, recompile and decompile function
- worldwide 28 tutorials with maxbox starter series, arduino and Blix
- also starts from stick or share on linux systems
- softpedia, d3000 and heise award EKON best
- COM, serial, html, xml, http, rest and ftp functions (indy sockets)
- more than 15150 functions in V3.9.9
- contains maXcom, maXbase, maXtex, maXnet and maXbook
- Units of JEDI, CLX, VCL, PCRE, SysTools, Indy, TurboPower in Delphi VirtualMachine
- Units Explorer, WebServer, Browser and CryptoBox on Board
